

DIFFERENT CONFIGURATIONS

An ALBATROS® set consists of three parts: the power generator, the signal generator (electronic box ALBATROS®) and accessories.

Configuration for electrode fishing with a distance between the anode and the ALBATROS® less than 30 m :

- An electronic box ALBATROS®.
- A cathode.
- An anode.
- An anode carrier stick.
- A pair of magnetic gloves.
- A winder for anode electrode with 30 m cable.
- A generating unit.

Configuration for trawl fishing with a distance between the trawl net and the ALBATROS® of less than 100 m (depth of less than 25 m):

- An electronic box ALBATROS®.
- A generating unit.
- A range of accessories made to measure.

Other configurations are possible. To increase their efficiency, you can for exemple electrify your usual fishing tools such as your nets.
